MEETING SUMMARY

Parks & Recreation Commission Regular Meeting

6:30 PM - October 3, 2018

City Hall Council Chambers, Sammamish, WA

Commissioners Present:

Chair Hank Klein, Parks and Recreation Commissioner, Position 9
Vice-Chair Sid Gupta, Parks and Recreation Commissioner, Position 5
Loreen Leo, Parks and Recreation Commissioner, Position 1
Cheryl Wagner, Parks and Recreation Commissioner, Position 3
Sheila Sappington, Parks and Recreation Commissioner, Position 7
Nancy Way, Parks and Recreation Commissioner, Position 8

Commissioners Absent:

Katherine Low, Parks and Recreation Commissioner, Position 2
Sara Houpis, Parks and Recreation Commissioner, Position 4
Stephanie Hibner, Parks and Recreation Commissioner, Position 6

Staff Present:

Angie Feser, Director of Parks & Recreation
Anjali Myer, Deputy Director of Parks & Recreation
Belle Stanley, Administrative Assistant
Chris Jordan, Recreation Manager
Lynne Handlos, Recreation Coordinator

CALL TO ORDER

Chair Klein called the Sammamish Parks & Recreation Commission meeting to order at 6:35 PM.

ROLL CALL

Roll call was called.

APPROVAL OF AGENDA

Approved as presented.

APPROVAL OF THE MEETING SUMMARY

Approved as presented.

PUBLIC COMMENT

Mary Wictor – 408 208th AVE NE Topic - Land Acquisition and Neighborhood Character

Draft

TOPICS

Recreation Division - 2018 Summer Report

Chris Jordan, Recreation Manager, recapped the events and activities presented to the Sammamish community over the last year.

2019-20 Budget Update

Angie Feser, Director, Parks & Recreation, presented an overview of the budget submitted to Council on September 25, 2018.

Land Acquisition Update

Anjali Myer, Deputy Director, Parks & Recreation, presented an update to the land acquisitions: the Beaton property, the Sahalee property and the Kinderace property.

CHAIRMAN'S REPORT

Sid - Pine Lake Garden Club members proposed a Sammamish Botanical Garden. They would also like to assist with the Heritage Garden at Big Rock Park, Site B and the native plant garden at Lower Commons. The new group has great energy and new ideas.

Big Rock, Site B Council Study session - concerns about consideration of council to divert some funds from Parks to roads.

DIRECTOR'S REPORT

Parks Maintenance on fall/winter schedule, Mondays through Fridays. Weekends, parks are opened by maintenance contractor; closed in evenings by police.

Reard House underway. Big Rock Park - Council questioned the expenditures proposed for development to open Site B.

Sammamish Landing irrigation complete. Ready for planting.

Klahanie Master Plan consultants to be interviewed.

Zaccuse Creek restoration project complete; restoration planting to be completed.

PARKS COMMISSION LIAISON REPORTS

Sammamish YMCA - Sheila

Sammamish Market - Stephanie

Community Garden - Stephanie

NEEDED FROM COMMISSION:

Park Systemwide Wayfinding Program (PSWP) update

KEY FACTS AND INFORMATION SUMMARY:

The purpose of this discussion is to brief the Parks & Recreation Commission on the status of the PSWP, and to receive direction on preliminary program goals.

Summary:

The 2018 PRO Plan identified a need for a comprehensive wayfinding system to help people navigate to the parks in Sammamish, and orient visitors once within the parks. There are currently 14 City-

owned parks and preserves in Sammamish's park system. As of now, only 3 of the City's parks and preserves have directional signage to help guide visitors to their destination.

Wayfinding is a comprehensive system of visual standards that guides people through the physical environment and enhances their understanding of spaces. An effective wayfinding system will not only provide directional and locational information for a park user, it can also help strengthen the park system's identity.

Wayfinding signage can be designed for vehicles, bicycles, or pedestrians. The PSWP will focus on vehicular directional signage that will guide users to each of Sammamish's parks. Typically installed in the City's right-of-way, vehicular directional signs are intended to lead users to a destination via preferred routes.

Since June of 2018, City staff have been researching the complexity of wayfinding principles and exploring local examples. The following is a preliminary list of goals for review:

- Standardize vehicular wayfinding signage using universally understood signage guidelines
- Collaborate with Public Works and other departments
- Identify a phased implementation plan
- Develop a conceptual vehicular wayfinding plan
- Install vehicular wayfinding signs to encourage use and exploration of parks

Data collected during the public outreach component of the PRO Plan will be used to assist the development of the PSWP. In the coming months, staff will begin gathering information from park users such as which parks are most in need of wayfinding and preferred routes of travel. Staff will identify a phased implementation plan which will include signage design, potential sign locations, and a preliminary installation schedule. Although this effort is specific to the Parks & Recreation Department, there will be multiple milestones throughout the process that will require coordination with other departments.

Project Background:

The Parks & Recreation Department began standardization and implementation efforts for wayfinding within City parks and preserves in 2014. Wayfinding within City parks and preserves includes, but it is not limited to monument signs, entry map signs, and trail intersection signs. Wayfinding signage within parks and preserves will continue to be installed and is separate from the PSWP.

FINANCIAL IMPACT:

\$57,000 is allocated in the 2018-2019 Parks CIP budget for the Park Systemwide Wayfinding Program.

OTHER ALTERNATIVES CONSIDERED:

- The Parks & Recreation Commission may choose not to recommend some or all of the preliminary goals for the Parks Systemwide Wayfinding Program.

RELATED CITY GOALS, POLICIES, AND MASTER PLANS:

[2018 PRO Plan](#), adopted by City Council on March 27, 2018.

Presentation Topics

- Overview
- Standard Wayfinding Principles and Design
- Existing Conditions
- Beaver Lake Park Preliminary Case Study
- Next Steps

Overview

What We Need from You

- Goal setting
 - Do our goals align?
 - Are we missing anything?

What is Wayfinding?

- A means of helping people navigate a place
 - Car
 - Bike
 - Pedestrian
- System of visual standards
- Establishes a sense of place in people's minds

2018 PRO Plan

- Identified need for comprehensive wayfinding program
 - Strengthens park system identity
 - Provide directional to and within parks
- \$57,000 allocated in 2018-19 budget
- Parks specific, but collaborating with other departments

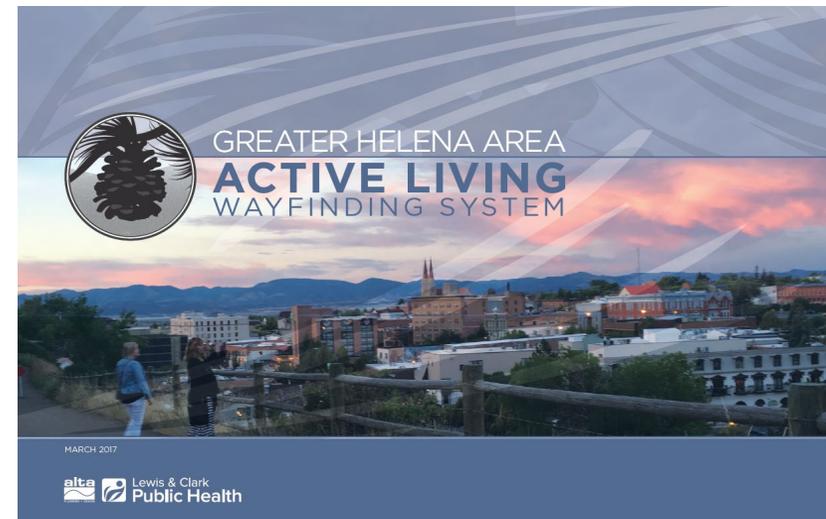

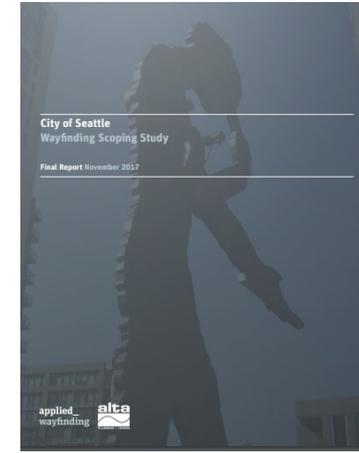

**CITY OF
SAMMAMISH**

**2018
PRO
plan**
PARKS, RECREATION
& OPEN SPACE PLAN

February 2018

Research Component

- Plans and reports from other cities
- Summary of findings
 - Unique to each city
 - Typically city-wide

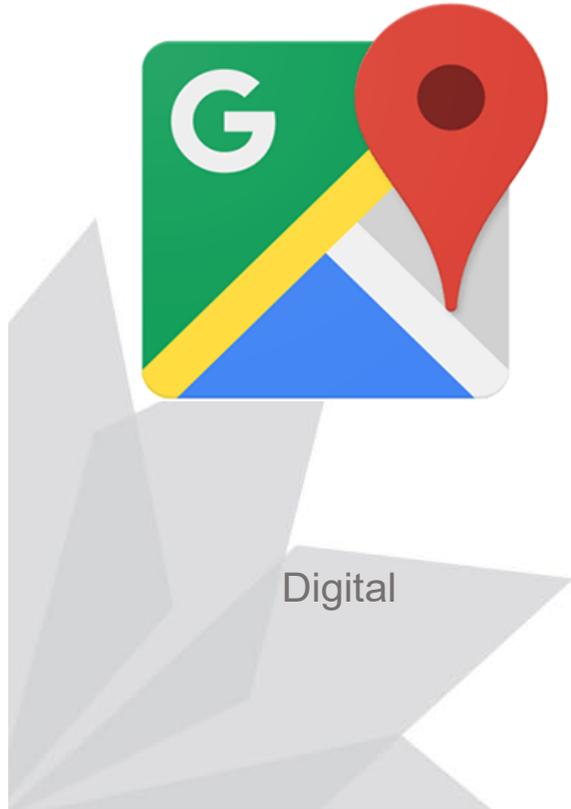

The Importance of Wayfinding

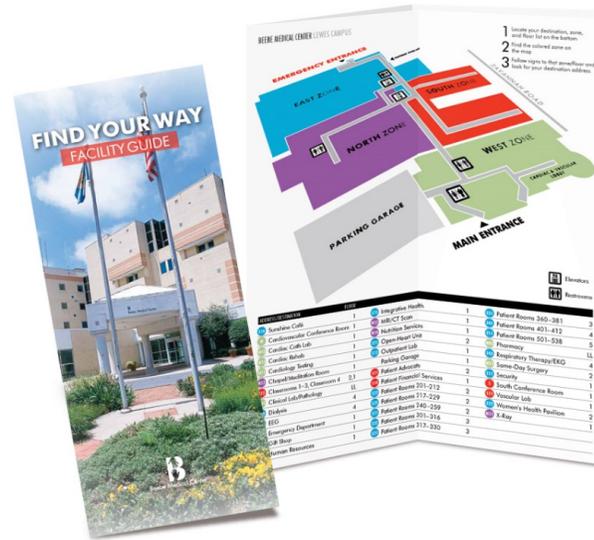

- Establish a sense of place
- Encourage healthy transportation
- Provide clear and legible navigation to improve circulation
- Standardize signage

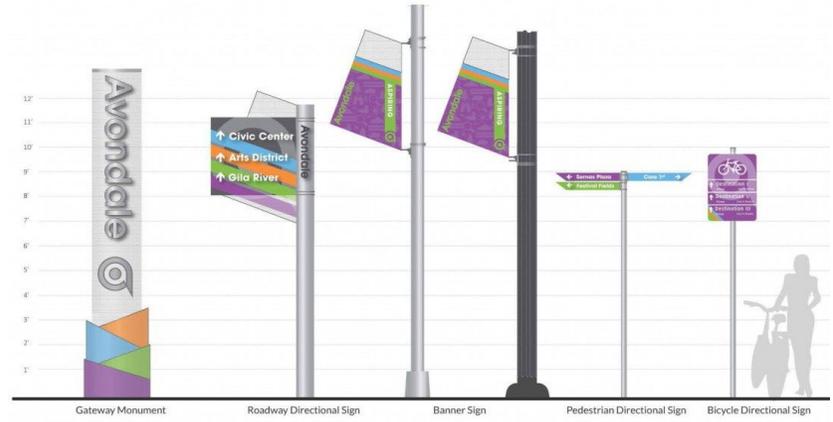

Main Types of Wayfinding

Digital

Physical

Signs

Wayfinding Signs

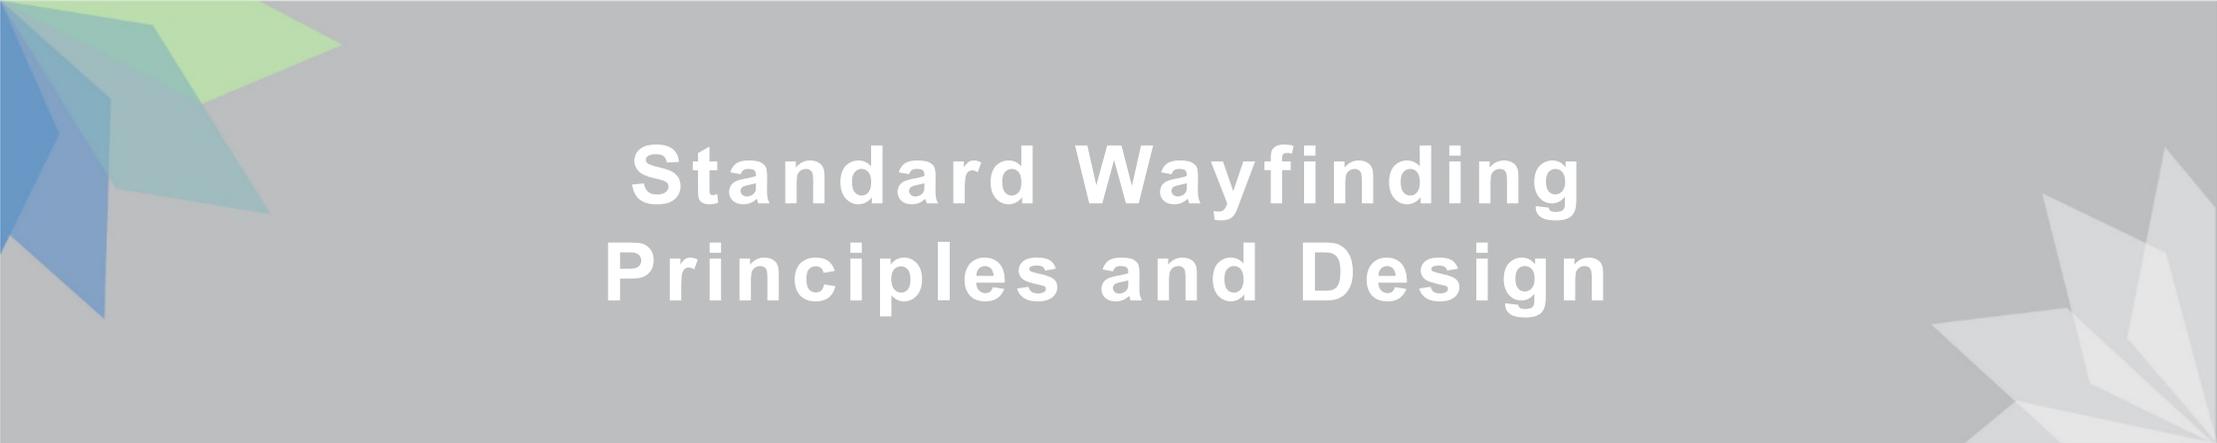

- Monument
- Vehicular
- Bicycle
- Pedestrian

Preliminary Goals

- **Standardize** vehicular wayfinding signage
- **Collaborate** with Public Works and other departments
- **Identify** a phased implementation plan
- **Develop** a conceptual vehicular wayfinding plan
- **Install** vehicular wayfinding signage to encourage use and exploration of parks

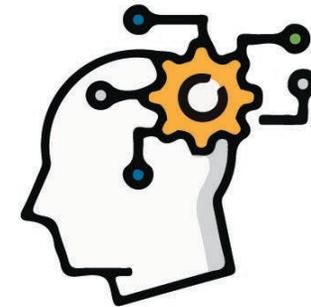

Standard Wayfinding Principles and Design

Wayfinding Should...

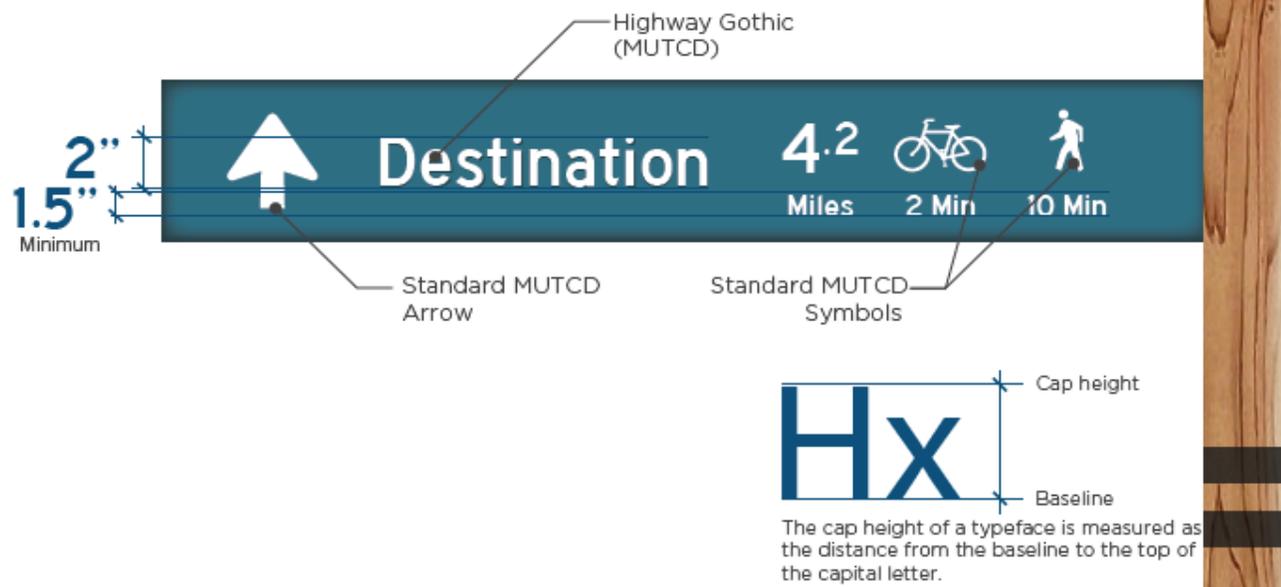

- Connect people and places
- Promote active travel
- Maintain motion
- Be predictable and consistent
- Keep information simple and accessible

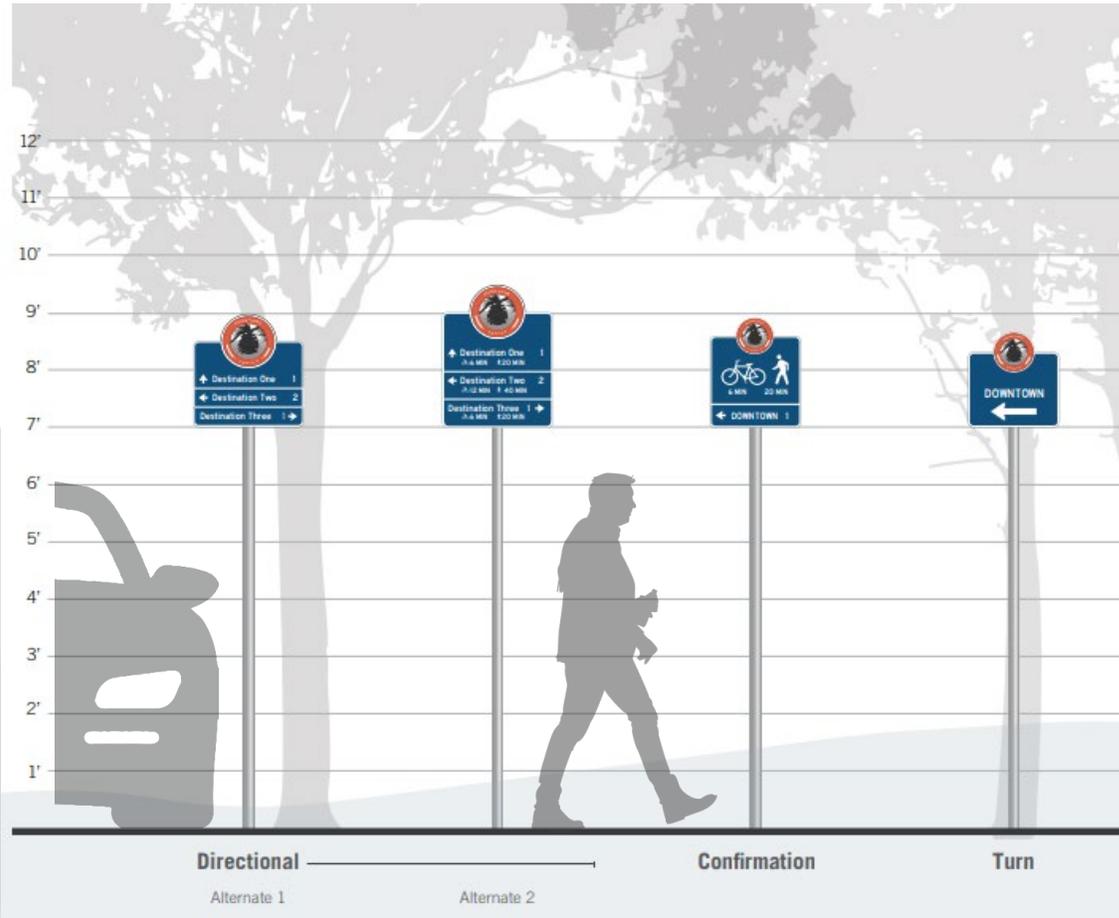

Design and Placement Guidelines

- Colors
- Text size
- Hierarchy
- ADA compliance
- Installation options & requirements

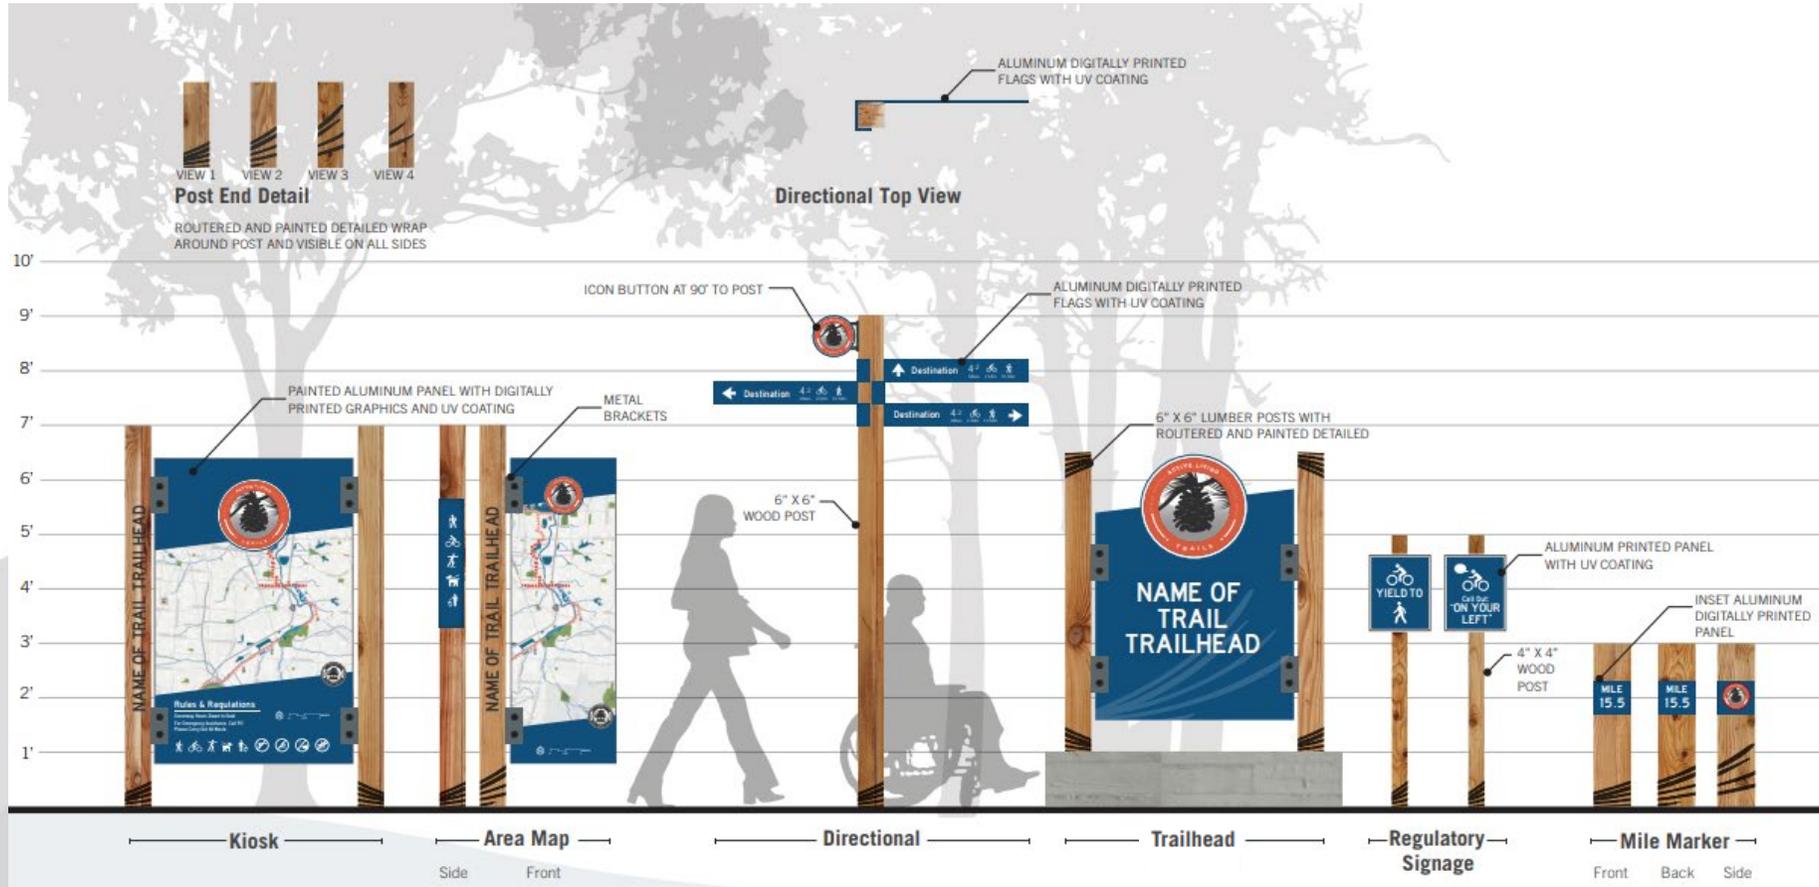

Vehicular and Bicycle Wayfinding Design

Greater Helena Area Active Living Wayfinding System - 2017

Pedestrian Wayfinding Design

Greater Helena Area Active Living Wayfinding System - 2017

Existing Conditions

Work Completed to Date

- Internal park wayfinding
 - Monument signs
 - Entry maps
 - Trail intersections
- City-wide rebranding effort

Sammamish Inventory

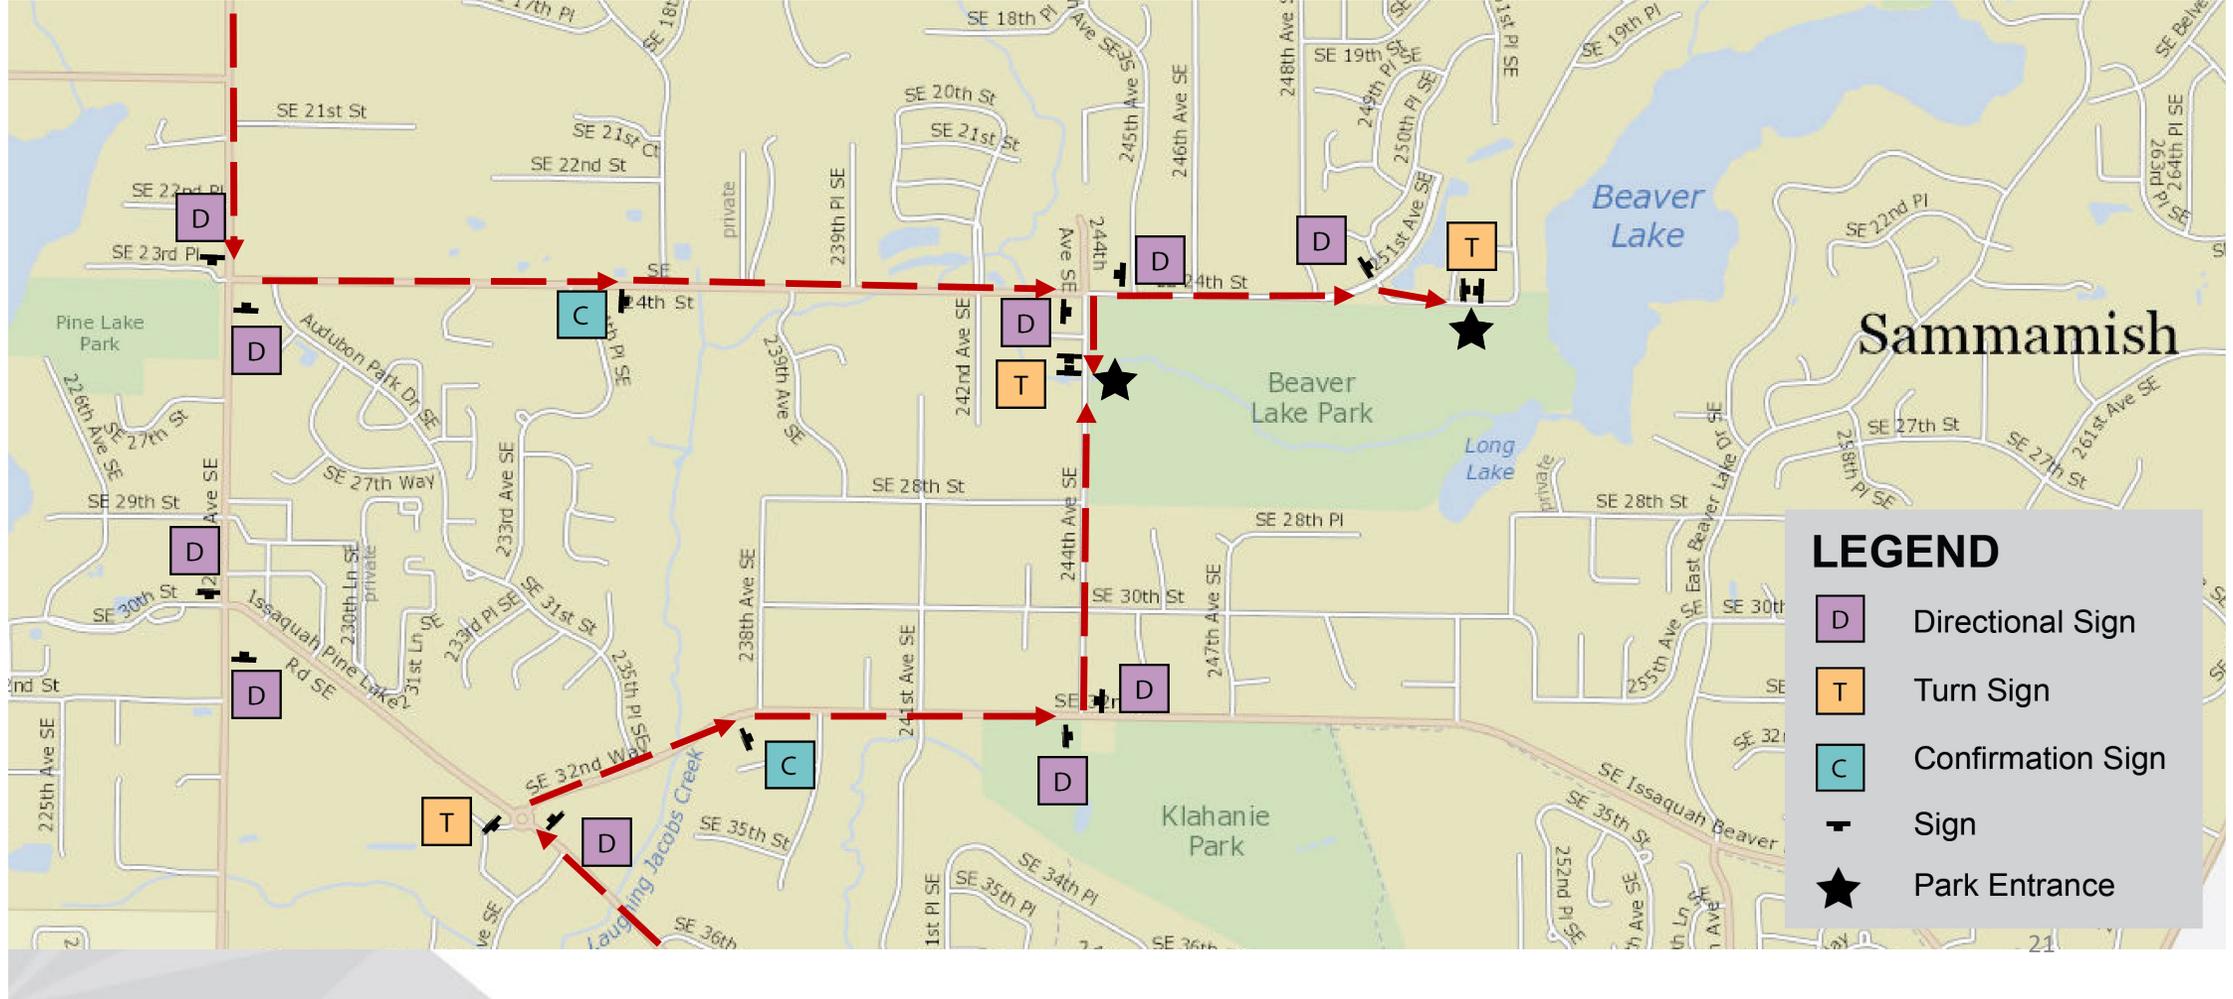

- 14 City-owned parks
- 18 miles of trails on City-owned property
- 6 vehicular directional signs

Beaver Lake Park Preliminary Case Study

Beaver Lake Park

Next Steps

Parks Commission Input

- Goals
 - **Standardize** vehicular wayfinding signage
 - **Collaborate** with Public Works and other departments
 - **Identify** a phased implementation plan
 - **Develop** a conceptual vehicular wayfinding plan
 - **Install** vehicular wayfinding signage to encourage use and exploration of parks
- Thoughts?

Thank you!

Agenda Bill

Parks and Recreation Commission Regular Meeting
January 09, 2019

NEEDED FROM COMMISSION:

Klahanie Park Master Plan Discussion

KEY FACTS AND INFORMATION SUMMARY:

The purpose of this discussion is to introduce the Parks & Recreation Commission to the Master Plan project at Klahanie Park.

Summary:

The 2018 PRO Plan, adopted by City Council in February 2018, identified the Master Plan at Klahanie Park as the second highest priority for park planning projects in the Parks Capital Improvement Plan (CIP) for 2018-2023.

In 2016, Klahanie Park came under City ownership. Since that time, modest improvements have been made at the park on an as needed basis. Having been in use for nearly 25 years with only minor improvements, park features are nearing the end of their life cycle or are in need of major repair. A master plan will be the City's first attempt to look at potential improvements to this park in a comprehensive manner utilizing a process that involves the entire community.

Project Background:

Klahanie Park is a 64-acre park located in the southeast section of the City. The park is comprised of natural turf fields including two multi-purpose sports fields, one baseball field and a cricket pitch. Additionally, the park features a small play structure, restrooms, parking, a segment of King County's East Plateau Regional Trail, natural areas and Queen's Bog, which is one of roughly fifty bogs located in Washington State.

The park was built by a Homeowners Association and transferred to King County in 1994 following construction. In January 2016, Klahanie Park was transferred to the City as part of the Klahanie annexation. Since annexation, modest improvements have been made to the park, which include drainage modifications to the baseball field, installation of the City's first cricket pitch, turf aeration of the two multi-purpose sports fields and renovations to the restrooms.

Following annexation, the City took over field reservations for the two multi-purpose fields and baseball field. In addition, the City introduced annual recreation events during the summer, such as Shakespeare in the Park and KidsFirst.

Consultant Selection & Master Plan Process:

In October 2018, a Request for Proposals (RFP) was published for consultant services to complete the master plan for Klahanie Park. Based on the quality of previous planning and design work with projects of similar nature, and the experience and qualifications of their staff, Hough, Beck and Baird Inc. (HBB) was selected through the consultant selection process for the project.

A twelve to eighteen-month effort is anticipated for the master plan process and shall engage public involvement, with participation from the community at large, City staff, Parks & Recreation Commission, City Council, and community stakeholders. The master plan process will consist of three phases as described below:

Phase 1 Site Investigation and Analysis

Evaluate existing site conditions, identify sensitive areas, complete site studies, and develop an overall understanding of the site. During this initial phase, a survey will be developed and used to assist with the development of initial park concepts for public discussion.

Phase 2 Park Program

Following survey development, the first public meeting will be held to present site analysis, initial survey results, and provide the community an opportunity to share their hopes, dreams and concerns for the park.

Based upon the results of site analysis, City staff input, technical input and initial public input, a preliminary park design program will be developed that details proposed uses, design character and criteria.

Phase 3 Master Plan Development

The remaining public engagement will take place during the third phase of the master plan process. Three Master Plan alternatives will be prepared, based upon the approved design program. This will include a narrative that summarizes the existing conditions, design alternatives, cost implications and regulatory criteria, and identifies issues which will require further study at the next stage of project development.

Based upon feedback from the community, Parks & Recreation Commission, and City Council, the three alternatives will be revised in to one preferred Master Plan alternative with a preliminary cost estimate. The final deliverable will be a Master Plan Report, with final project drawings and narrative, project process, project phasing scenarios and phase costs.

Timeline:

- Consultant Selection and Project Kickoff: Winter 2019
- Site Investigation & Analysis: Spring 2019
- Park Program: Summer 2019
- Master Plan Development: Fall 2019
- SEPA Review: Winter 2020
- Master Plan Adoption: Spring 2020

FINANCIAL IMPACT:

\$250,000 is allocated in the 2018-2019 Parks CIP budget for the Klahanie Park Master Plan and is inclusive of all planning and design costs.
